**Yasmin Khan  
MD, MPH, FRCPC**

**Biosketch**

Dr. Yasmin Khan is an academic emergency physician based in Toronto, Canada. Dr. Khan completed her BSc at Queen's University (1998) and MD at the University of Western Ontario (2002). She pursued her Royal College postgraduate training in Emergency Medicine (2007) and Master of Public Health in Community Health and Epidemiology at the University of Toronto (2010). She also completed a postgraduate fellowship in Public Health Policy with the Canadian Institutes of Health Research (CIHR) Strategic Training Program at the University of Toronto (2010-11).

Dr. Khan focuses her scholarship at the intersection of emergency medicine and public health. She is an Assistant Professor (Clinician Investigator) in the Division of Emergency Medicine, Department of Medicine, University of Toronto. She has practiced as an Emergency Physician at the University Health Network in Toronto since 2007. Dr. Khan has served as a part-time Physician at Public Health Ontario specializing in emergency preparedness since 2012, currently part of Communicable Diseases, Emergency Preparedness and Response. She is a member of the World Association for Disaster and Emergency Medicine (WADEM) and served as co-chair in organizing the Public Health Track for the 2017 WADEM Congress in Toronto, the track which saw the greatest growth in interest and submissions.

**Summary of research interests**

Broad scholarly interests across research and teaching include systems-based approaches, evidence-based practice, and the social determinants of health. As a New Investigator, Dr. Khan has focused in the area of disaster medicine and health system emergency preparedness. She is a CIHR-funded researcher whose research program aims to generate knowledge for enhanced system-level readiness for emergencies, and better understand strategies for health system resilience to public health emergencies. Further, her research aims to advance science and apply evaluative approaches which will address the lack of evidence to inform policy and practice in this field. Her methodological expertise spans quantitative and qualitative approaches and includes epidemiology; knowledge synthesis; mixed methods surveys; and participatory research techniques. Dr. Khan's research employs integrated knowledge translation with end users to ensure practice and policy relevance and usefulness, and embeds consideration for values and equity throughout the research process.

Specific areas of current research include performance measurement for public health emergency preparedness; learning during recovery from emergencies and disasters; communication strategies for emergencies; and surveillance and epidemiology. Further details and publications are provided on the following page. In recognition of her work in the field, Dr. Khan was recently invited to present at the United States National Academies of Science, Engineering and Medicine (Health and Medicine Division) to the Committee on Evidence-based Practices for Public Health Emergency Preparedness & Response.

## **Description of major recent and ongoing projects**

### ***Advancing performance measurement for public health emergency preparedness in Canada (2015-18)***

#### ***Funding source: CIHR***

- This national study aims to answer the questions: 1) Are we prepared?; and 2) How do we measure it? The sequential mixed methods study will develop a framework for public health emergency preparedness and a set of indicators to inform performance measurement and quality improvement for public health.

### ***Learning lessons during recovery (2017-18) Funding source: Internal peer-reviewed grant***

- This study aims to understand strategies and challenges for learning after an emergency to support a process of improvement and building organizational resilience to emergencies.

### ***Communication and collaboration across the health system and strategies for emergencies***

- Projects in this theme have examined strategies for effective communication from public health to emergency physicians and mechanisms to leverage social media for emergency preparedness.
